

TECHNICAL SPECIFICATIONS AND BASIC CHARACTERISTICS

DUSHKA High-Calibre Selfloading rifle cal. 12,7x99mm (.50 BMG)

Main Characteristics: The DUSHKA selfloading rifle cal.12,7x99mm is based on DShKM heavy machinegun. Now as a brand new modernized advanced version is under production in Slovak republic (EU) and offered as a portable or vehicle-mounted gun. The DUSHKA is a gas operated, belt fed, air cooled selfloading rifle, that fires from an open bolt. The gas piston and chamber are located below the barrel, the gas piston is of the long stroke type and is attached to the bolt carrier. The gas chamber is fitted with a gas regulator, which requires a special wrench to make adjustments. The rear of the receiver houses two spring buffers, one for the bolt and one for the bolt carrier. The heavy barrel is finned for better cooling, and is fitted with a large muzzle brake. The barrel can be detached from the weapon and replaced quite fast and easily.

DUSHKA selfloading rifle Basic Tactical-Technical Characteristics
